### Alpha Motor Warranty

All Alpha LV Electric Motors supplied by Bearings International are warranted against defects in manufacturing workmanship and materials for twelve (12) months from date of supply.

This warranty does not apply to any product which has been subject to misuse, misapplication, neglect (including without limitation, inadequate maintenance, accident, improper installation, modification, adjustment, repair or any other cases originated from inadequate applications).

Bearings International will neither be responsible for any expenses incurred in installation, removal from service, consequential expenses such as financial losses nor transportation costs as well as tickets and accommodation expenses of a technician when this is requested by the customer.

The repair and/or replacement of parts or components, when supplied by Bearings International within the Warranty period does not give a Warranty extension, unless otherwise expressed in writing by Bearings International.

The supply date is effective from the date of invoice. The invoice must stipulate the motor's serial number for the warranty to be valid.

Failure to produce an invoice showing the motor serial number will void the warranty.

This warranty is to be read in conjunction with our Standard Terms and Conditions which is available on request.
