

R

in motion

COMPANY PROFILE

SAFETY

Bearings International (Bi) supplies and services high-quality interconnected mechanical consumables that facilitate movement and ensure uptime for industrial customers across South Africa.

As a proud member of the Hudaco Group, we combine technical expertise with a strong national presence to support a wide range of industries.

With a customer-focused approach at the heart of everything we do, Bearings International is committed to delivering consistent value to our stakeholders.

Our goal is to keep your operations in motion — efficiently, reliably, and with maximised uptime.

ESTABLISHED
1957

COUNTRY
WIDE

BEE
CERTIFICATION

ISO
CERTIFICATION

Established in 1957, Bearings International (Bi) has grown to become a trusted leader in the supply and distribution of bearings and power transmission components across South Africa. With a legacy spanning over six decades, the company has built a reputation for innovation, technical expertise, and service excellence.

The journey began to take shape in 1963 when Bearings International acquired the Koyo bearing agency from the Koyo Seiko Company in Japan. Just a few years later, in 1966, Hubert Davies acquired the Engineering Trust Company— then the holding entity for G.H. Langler, Roger Jenkins, Bearings International, and Charter Engineering—and unified these businesses under the Bearings International brand.

A major expansion followed in 1968, with Bearings International opening depots across the country, establishing a national footprint and improving accessibility to customers.

In 1978, Bearings International, along with other supply companies including Deutz Diesel, Circle Pumps, and Roller Chain, was reorganised under Hubert Davies Engineering Supply Company. This entity was soon after acquired by Blue Circle Limited, marking another key chapter in Bearings International's corporate history.

65+
YEARS

In 1985, a management buyout from Blue Circle led to the formation of what is known today as Hudaco Industries, under which Bearings International continues to thrive.

The 2000s marked further milestones for the company. In 2005, Bearings International was appointed an official FAG distributor, strengthening its product offering with one of the world's most respected bearing brands. In 2012, the company's Head Office was relocated from 190 Barbara Road in Isando, Johannesburg, to a modern facility in Parkhaven, Boksburg.

In 2025, Bearings International introduced its reseller portal, enabling easier access to product information, ordering, and support—underscoring its commitment to digital transformation and customer convenience.

Today, Bearings International proudly operates with:

- 50+ branches strategically located nationwide
- Over 300 employees dedicated to delivering value and support
- More than 150 Technical Sales Engineers offering expert on-site service
- A portfolio of 43+ leading global brands in its distribution network
- A vast 108,000 cubic metres of warehouse space
- 12+ million kilometres travelled annually to serve customers
- 24-hour national assistance, ensuring customer uptime and peace of mind

With a strong infrastructure, skilled workforce, and a customer-centric approach, Bearings International continues to drive industrial performance, efficiency, and innovation across Southern Africa.

1957

Bearings International is established and started trading

1963

Koyo Bearing Agency acquired from Koyo Seiko Company, Japan

1968

Bearings International opens up country wide depots

1978

Hubert Davies Engineering Supply Company that consists of Bearings International, Roller Chain and other supply companies is acquired by Blue Circle Limited.

1985

Hubert Davies Engineering Supply Company is bought from Blue Circle Limited by its management, today known as Hudaco Industries.

2005

Bearings International was made an official FAG distributor.

2008

Bearings International signed up as Channel Partner with ABB

2025

Launched Reseller Portal and still pioneering motion solutions.
